<i>Preface</i>	ix
1 Fundamentals of the anaerobic digestion process	1
<i>J. Mata-Alvarez</i>	
1.1. Introduction	1
1.2. Thermodynamics of reactions	6
1.3. Environmental factors controlling the AD process	9
1.4. Control of anaerobic digesters	15
1.5. Conclusions and perspectives	17
1.6. References	18
2. Reactor sizing, process kinetics, and modelling of anaerobic digestion of complex wastes	21
<i>J.L. García-Heras</i>	
2.1. Introduction	21
2.2. Microbial reaction kinetics	23
2.3. Process kinetics in anaerobic digestion	31
2.4. Reactor design	43
2.5. Dynamic modelling	50
2.6. Perspectives and conclusions	56
2.7. References	58

3	Analysis and optimisation of the anaerobic digestion of the organic fraction of municipal solid waste	63
	<i>W.T.M. Sanders, A.H.M. Veeken, G. Zeeman and J.B. van Lier</i>	
	3.1. Introduction	63
	3.2. Optimisation of yields	64
	3.3. Methanogenic activity tests	65
	3.4. The first-order hydrolysis constant	69
	3.5. Biodegradability	85
	3.6. Perspectives and conclusions	86
	3.7. References	88
4	Anaerobic digestion of the organic fraction of municipal solid waste: a perspective	91
	<i>J. Mata-Alvarez</i>	
	4.1. Introduction	91
	4.2. Laboratory-scale research	93
	4.3. Demonstration and development plants: the next step	95
	4.4. Commercial plants	96
	4.5. Present research on anaerobic digestion	98
	4.6. Biodegradability: an important parameter in anaerobic digestion	102
	4.7. Final remarks	104
	4.8. References	105
5	Types of anaerobic digester for solid wastes	111
	<i>P. Vandevivere, L. De Baere and W. Verstraete</i>	
	Abbreviations And Definitions	111
	5.1. Introduction	112
	5.2. One-stage systems	114
	5.3. Two-stage systems	126
	5.4. Batch systems	133
	5.5. Perspectives and conclusions	136
	5.6. References	137
6	Characteristics of the OFMSW and behaviour of the anaerobic digestion process	141
	<i>F. Cecchi, P. Traverso, P. Pavan, D. Bolzonella and L. Innocenti</i>	
	6.1. Introduction	141
	6.2. The OFMSW from mechanical sorting (MS-OFMSW)	142
	6.3. OFMSW from separate and source collection (SC-OFMSW and SS-OFMSW)	148
	6.4. Operational parameters for the management of an anaerobic digester	151
	6.5. Anaerobic digestion process of substrates with different biodegradability	161
	6.6. Sizing of an anaerobic digester for the treatment of the OFMSW on the basis of the operational parameters and loading factors	174
	6.7. References	178

7	Co-digestion of the organic fraction of municipal waste with other waste types	181
	<i>H. Hartmann, I. Angelidaki and B.K. Ahring</i>	
	7.1. Introduction	181
	7.2. General aspects of co-digestion	183
	7.3. Modelling the co-digestion process	191
	7.4. Large-scale plant experiences with co-digestion	194
	7.5. Conclusion	197
	7.6. References	197
8	Pretreatments for the enhancement of anaerobic digestion of solid wastes	201
	<i>J.P. Delgenès, V. Penaud and R. Moletta</i>	
	8.1. Introduction	201
	8.2. Mechanical pretreatments	202
	8.3. Biological pretreatments	205
	8.4. Physico-chemical pretreatments	212
	8.5. References	223
9	Use of hydrolysis products of the OFMSW for biological nutrient removal in wastewater treatment plants	229
	<i>F. Cecchi and B. Battistoni</i>	
	9.1. Introduction	229
	9.2. State of the art	236
	9.3. Impact of the fermented OFMSW addition on wastewater treatment processes	241
	9.4. The integrated process: basic balances and design	246
	9.5. Case study: Treviso city wastewater treatment plant	256
	9.6. Perspectives and conclusions	259
	9.7. Acknowledgements	261
	9.8. References	261
10	Products, impacts and economy of anaerobic digestion of OFMSW	265
	<i>W. Edelmann</i>	
	10.1. Introduction	265
	10.2. Biogas utilization	266
	10.3. Production and marketing of compost	269
	10.4. Treatment of surplus water	273
	10.5. Environmental impact assessments of biowaste treating	277
	10.6. Economy of biogenic waste treatment	289
	10.7. Perspectives and conclusions	293
	10.8. References	298

11	Anaerobic digestion of organic solid waste in bioreactor landfills	303
	<i>F.G. Pohland, A.B. Al-Yousfi and D.R. Reinhart</i>	
	11.1. Introduction	303
	11.2. Landfill process enhancement	304
	11.3. Emerging developments and implementing strategies	308
	11.4. Conclusions	314
	11.5. References	314
	<i>Index</i>	317
